Sealy, Texas (November 17, 2022) – [Hennessey](#), the Texas-based [hypercar](#) manufacturer, and high-performance vehicle creator, has introduced an overlanding upgrade for its MAMMOTH TRX truck. The comprehensive package enables the world's most powerful pickup truck to take adventure-oriented owners further into the wild than ever before.

Overlanding is vehicle-based, on-road and off-road adventure travel with a focus on self-reliance, resilience, and enjoyment of the journey – getting there is half the fun. With that in mind, the Hennessey MAMMOTH 1000 TRX offers adventurers 1,012-horsepower of 4x4 go-anywhere performance combined with everything needed to be comfortable in the remote backwoods.

The tailored Overland Edition includes a wide range of user-friendly equipment for truck-based living. The modular system utilizes a robust TRX bed rack as its foundation, topped by a convenient hard-shell rooftop tent that takes mere minutes to set up. A retractable 55-inch awning provides shade and shelter, while auxiliary fuel tanks and a pressurized water reservoir are also mounted on the rack to increase range and utility. Other accessories include a 28-inch splitting axe, shovel, and LED perimeter illumination. Grab handles, and a retractable ladder improve accessibility to the tent and equipment.

The new Overland Edition is available on the company's 'MAMMOTH 900' or 'MAMMOTH 1000' versions of the RAM TRX. Professionally installed by Hennessey Performance technicians, the comprehensive upgrade can be added to any MAMMOTH build for \$19,950.

The MAMMOTH 1000 TRX is celebrated as the world's fastest and most powerful truck. This performance comes courtesy of its 6.2-liter supercharged 'Hellcat' V8 enhanced with Hennessey's high-flow 2.65L supercharger, larger fuel injectors, and high-flow induction system alongside performance-boosting calibration modifications. The upgrades result in a go-anywhere truck with 1,012 bhp @ 6,500 rpm and mountainous torque of 969 lb-ft @ 4,200 rpm.

John Hennessey, company Founder, and CEO: "Our new MAMMOTH 1000 TRX Overland Edition is the ultimate adventure-oriented vehicle as it adds off-the-grid capability to the world's most powerful pickup. Thanks to the modular convenience of the system and its seamless integration, explorers may travel to remote areas and effortlessly set up camp without compromising performance or 4x4 capability. There's nothing else like it!"

Measuring 228.9 inches (5.81 meters) long, 82.1 inches (2.09 meters) wide, and 77.6 inches (1.97 meters) high, the imposing Hennessey supertruck makes an enormous statement on- or off-road. Capable of carrying five adults in first-class comfort and towing more than three tons, the MAMMOTH is the most comprehensive and capable performance overlanding truck on the market.

Overlanding customers will typically specify Hennessey's Stage 2 off-road enhancement package for their TRX. This package adds robust custom bumpers, vision-boosting LED lights, a front leveling kit, gnarly 37-inch off-road tires, and upgraded electronic fold-out steps. The MAMMOTH 1000 TRX Overland with Stage 2 upgrades also benefits from Hennessey's comprehensive three-year / 36,000-mile warranty.

Orders can be placed for international shipping through authorized Ram retailers or Hennessey directly by calling +1 979.885.1300 or visiting [HennesseyPerformance.com](https://www.HennesseyPerformance.com).

About Hennessey

Based in Sealy, Texas, the Hennessey business comprises Hennessey Special Vehicles, Hennessey Performance (HPE), Tuner School, and the Lonestar Motorsports Park. The company has re-engineered more than 12,000 vehicles for performance enthusiasts worldwide to deliver unparalleled driving thrills. Alongside modifying a diverse range of sports and muscle cars since 1991, the company also applies its high-performance expertise to trucks and SUVs and boasts its own hypercars – the Venom GT and the Venom F5.

Every Hennessey product is dyno-proven, fully track-tested, street-legal, and warrantied. Customers can choose from road-ready performance-enhanced cars by Hennessey from a wide variety of brands, including Cadillac, Chevrolet, Dodge, Ford, and Jeep, all benefitting from a host of high-performance upgrades.

With its own test track, engineering curriculum for aspiring tuners, more than 85 team members, and capacity to work on 40-50 vehicles at a time, Hennessey Performance is one of the world's leading specialist vehicle engineering companies. The twin-turbocharged, 6.6-liter V8 Venom F5 hypercar sold out in 2021, with customer deliveries taking place from 2021-2023. A Roadster variant joined the F5 coupe in 2022, also boasting 1,817 bhp and capable of speeds in excess of 300 mph. The company is delivering like never before on its mission of 'making fast cars faster.' About John Hennessey

As the company founder and CEO, John Hennessey lives and breathes fast, fun cars. John developed a passion for performance while competing at world-renowned motorsport events, including Pikes Peak, the Silver State Classic, and the Bonneville Salt Flats (where he set a class world record).

What started in 1991, modifying imports out of his garage, soon morphed into building 1,000-horsepower twin-turbo Dodge Vipers that gained international recognition in car magazines such as *Motor Trend*, *Car and Driver*, *Top Gear*, and *Road and Track*.

Known as an American icon of speed, John has achieved his vision to be the top automotive tuner and builder in the U.S. With a global sales footprint covering the U.S., Europe, Asia, South America, and the Middle East, he continues to find ways to engineer greater performance from some of the world's most iconic vehicles alongside the creation of the company's world-class hypercar – the Hennessey Venom F5.
