**Sealy, Texas (June 23, 2021)** – Hennessey Performance Engineering (HPE), the Texas-based hypercar manufacturer and high-performance vehicle builder, has started production of the world's most powerful pickup truck, the Hennessey MAMMOTH 1000 TRX with its upgraded 6.2-liter supercharged Hellcat V8 boasting 1,012 hp.

Based on the 702 hp Dodge Ram 1500 TRX pick-up truck, the high-performance-focused enhancements by Hennessey cut the 0-60 mph time to just 3.2 seconds – the quickest in the world – while torque grows to 969 lb-ft. With modifications including a high-flow 2.65L supercharger, fuel injectors and high-flow induction system alongside performance-boosting calibration, the 6.2-liter V8 truck can achieve an 11.4-second quarter mile at over 120 mph.

**John Hennessey, company founder and CEO:** “The new MAMMOTH 1000 TRX is the most powerful pickup truck that Hennessey Performance has ever offered. The Ram TRX already boasts the highest horsepower of any vehicle manufacturer's pickup, so our performance, styling and off-road enhancements make this the most formidable new truck you can buy. We've already sold more than 100 trucks, with each answering one big question – why have a 1,000-horsepower pickup truck? Because we can!”

Measuring 228.9 inches (5.81 meters) long, 82.1 inches (2.09 meters) wide and 77.6 inches (1.97 meters) high, the imposing hypertruck makes an enormous statement on the road. Capable of carrying six adults in comfort, carrying a payload exceeding 2,300 lbs and towing more than 7,700 lbs, the Mammoth is the most comprehensive and capable performance truck on the market.

Including buying the stock TRX, owners opting for the Mammoth 1000 will typically pay in the region of \$150,000 for their build. The majority of owners will take a highly-specified stock model, and add the Mammoth 1000 package and the Stage 2 off-road enhancements. The popular Stage 2 package adds custom bumpers, LED lights, a front levelling kit, 37-inch off road tires and upgraded electronic fold-out steps. The Mammoth 1000 TRX complete turnkey package also comes with a 2 year / 24,000-mile warranty.

Hennessey will ensure exclusivity for its customers by limiting production volumes of the Mammoth 1000 with each truck fitted with a special chassis plate recording its build number. Just 200 will be produced in 2021 for customers across the US and around the world. Orders can be placed through authorized Ram retailers or Hennessey directly by calling 979.885.1300 or visiting [HennesseyPerformance.com](https://www.HennesseyPerformance.com).

## Specifications: Mammoth 1000 TRX

MAMMOTH 1000 TRX	EXTEROR UPGRADES
POWER	MAMMOTH OFF-ROAD STAGE 1
1,012 bhp @ 6,500 rpm	Mammoth Custom Front Bumper
969 lb-ft torque @ 4,200 rpm	Mammoth Custom Rear Bumper
	LED Lights in Front Bumper
PERFORMANCE	20-inch Hennessey 10-Spoke Wheels
0-60 mph: 3.2 seconds	35-inch Off-Road Tires

## About Hennessey

Based in Sealy, Texas, the Hennessey business comprises Hennessey Special Vehicles, Hennessey Performance (HPE), Tuner School, and the Lonestar Motorsports Park. The company has re-engineered more than 12,000 vehicles for performance enthusiasts from around the world to deliver unparalleled driving thrills. Alongside modifying a diverse range of sports, and muscle cars since 1991, the company also applies its high-performance expertise to trucks and SUVs – and boasts its own hypercars – the Venom GT and the Venom F5.

Every Hennessey product is dyno-proven, fully track-tested, street-legal and warrantied. Customers can choose from road-ready performance-enhanced cars by Hennessey from a wide variety of brands including Chevrolet, Dodge, Ford and Jeep in addition to benefitting from a host of high-performance upgrades.

With its own test track, engineering curriculum for aspiring tuners, more than 50 team members and capacity to work on 40-50 vehicles at a time, Hennessey Performance is one of the world's leading specialist vehicle engineering companies. The new 6.6-litre V8 Venom F5 hypercar is set for customer deliveries in 2021. Boasting 1,817 hp and a +311 mph top speed, the company is guaranteed to deliver like never before on its mission of 'making fast cars faster'. ## About John Hennessey

As the company founder and CEO, John Hennessey lives and breathes fast, fun cars. John developed a passion for performance while competing at world-renowned motorsport events including Pikes Peak, the Silver State Classic and the Bonneville Salt Flats (where he set a class world record).

What started in 1991, modifying imports out of his garage, soon morphed into building 1,000-horsepower twin-turbo Dodge Vipers that gained international recognition in car magazines such as *Motor Trend*, *Car and Driver*, *Top Gear*, and *Road and Track*.

Viewed as an American icon of speed, John has achieved his vision to be the top automotive tuner and builder in the U.S. With a global sales footprint covering the U.S., Europe, Asia, South America and the Middle East, he continues to find ways to engineer greater performance from some of the world's most iconic cars alongside the creation of the company's new world-class hypercar – the Hennessey Venom F5.
